NORMAL CLEAR FLOOR GLASS VS ULTRA CLEAR FLOOR GLASS

1st 1. Ultra clear floor glass is made from high quality materials and is designed to provide a clear, unobstructed view of the floor below. It is made from a special type of glass that is free from any impurities or inclusions that could cause distortion or discoloration. This makes it ideal for use in high-traffic areas where a clear view of the floor is essential.

2nd 2. Ultra clear floor glass is also designed to be highly durable and resistant to scratches and damage. It is made from a special type of glass that is much stronger than standard clear glass. This makes it ideal for use in high-traffic areas where the glass is likely to be subjected to heavy use and wear.

3rd 3. Ultra clear floor glass is also designed to be highly resistant to UV radiation. It is made from a special type of glass that is able to block out most of the harmful UV rays that can cause discoloration and damage to the floor below. This makes it ideal for use in areas where the glass is likely to be exposed to direct sunlight.

Ultra clear floor glass is made from high quality materials and is designed to provide a clear, unobstructed view of the floor below.
